

ATCA-7367-HDD1-SATA Quick Start Guide

P/N:6806800L59B (July 2014)

1 What's in the Box?

Make sure you receive all items of your shipment:

- ATCA-7367-HDD1-SATA
- Four M2.5x6 screws

When installing or servicing the module or accessories, strictly observe the safety precautions in the *Safety Notes*. Otherwise, personal injury or property damage may occur.

2 Observe ESD-safe Measures

- Use either a properly grounded ESD wrist strap or make sure that you are working in an ESD-safe environment.
- Connect to the ESD connector at the front or the rear of the system.

3 Prepare the Installation Site

- For information on the environmental and power requirements, see the *ATCA-7367 Installation and Use* manual.
- Operating temperatures refer to the temperature of the air circulating around the blade and not to the actual component temperature.

4 Install the SATA Module

1. Remove the blade from the system.
2. Plug the SATA module in the slot so that its standoffs fit in the mounting holes on the blade.
3. Fasten the SATA module to the blade using the four screws that come with the SATA module.
4. Reinstall the blade into the system. The SATA module is detected automatically during the boot-up sequence.

Finding more information

For more information on the product, see the *ATCA-7367 Installation and Use* and other related documentation.
