

## ATCA-7540-D

### Ruggedized Dual-Star 40G Server Blade

#### Data Sheet

#### *Bladed server platform with flexible I/O connectivity and ultimate processing performance*

- Two Intel® Xeon® Scalable processors (codename Skylake)
- Scalable performance range/core count
- Up to 384GB main memory DDR4 via 12 VLP DIMM sockets with speeds of 2400 MT/s
- Dual-star 40G Ethernet fabric
- Choice of compatible rear transition modules for I/O and storage options
- Dual on-board M.2 SSD sites
- Optional configuration with crypto offload
- Linux support
- DPDK-ready

**Advanced TCA®**

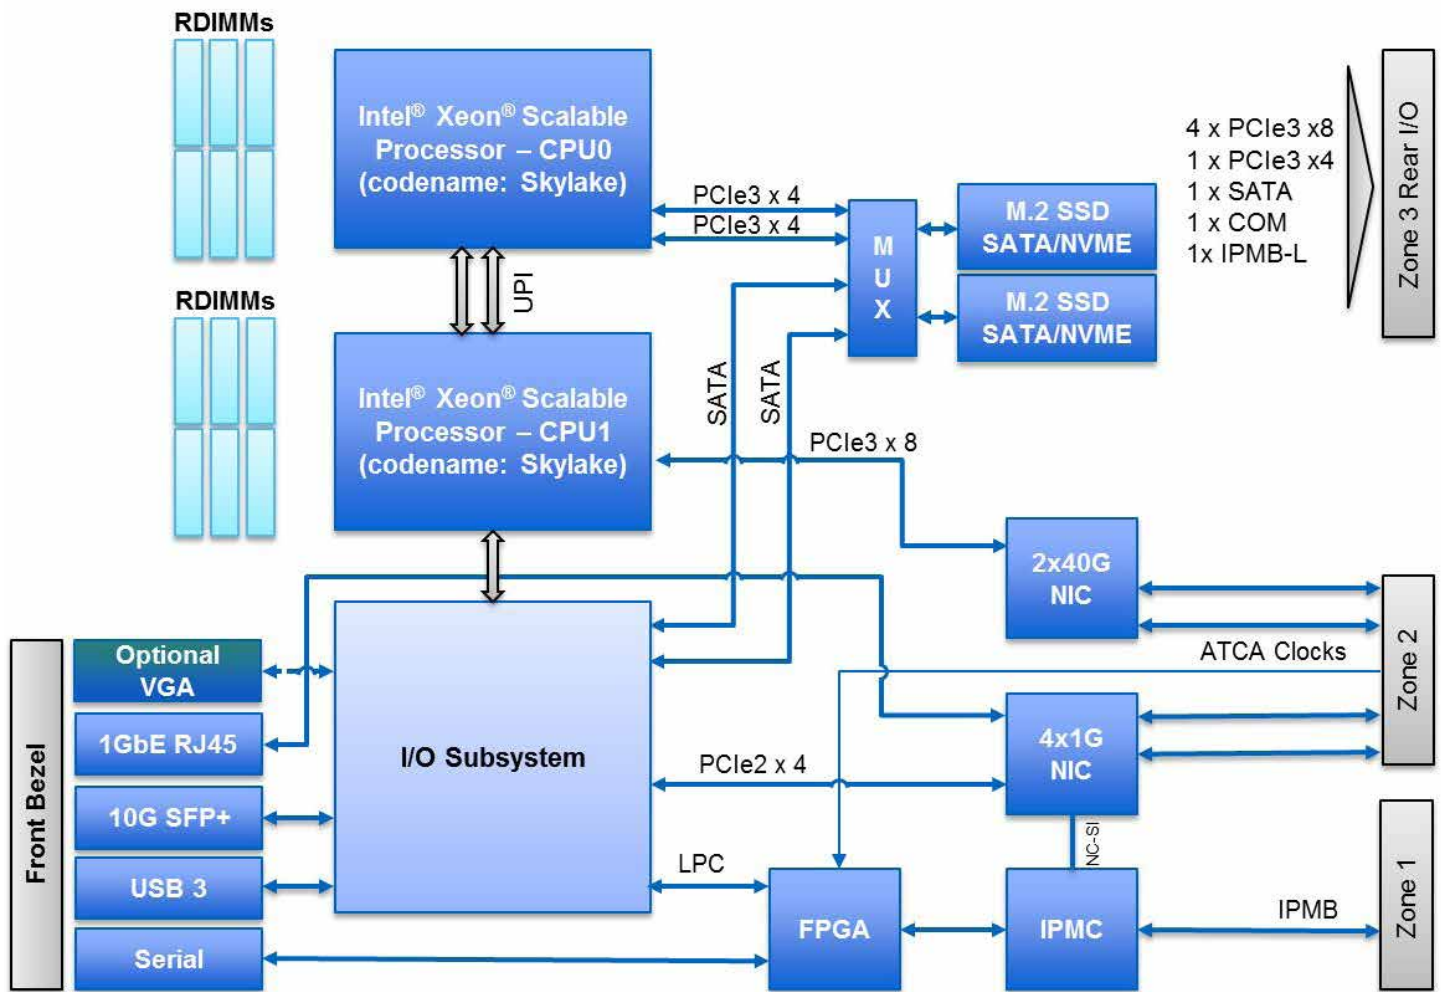

AdvancedTCA® is a COTS open standard bladed architecture that meets the requirements for Modular Open Systems Approach (MOSA) in a rugged, compact and power-efficient package.

ATCA® has a strong history of deployment in military and aerospace applications including shipboard communications and data center consolidation, naval tactical combat systems refresh, airborne reconnaissance, theater command centers, mobile TOCs, ground and airborne battle management systems, net-centric converged solutions for voice, video, and data, and C4ISR. All these programs require dense computing processor blades communicating over a 10G/40G integrated network. The Artesyn Embedded Technology ATCA-7540-D server blade brings the Intel® Xeon® Scalable processors (codename Skylake) to ATCA, extending both performance and longevity over existing server blades.

- Use of the next generation Intel® Xeon® Scalable processors (codename Skylake) provides a performance and longevity improvement over existing blades
- Adherence to the ATCA specification ensures compatibility with existing infrastructure
- I/O and crypto offload options future-proof designs
- OS & I/O options help ensure a seamless upgrade path from existing systems and provides the tools & flexibility necessary for new deployments

ATCA-7540-D Block Diagram

## Software Enablement

The ATCA-7540-D blade can be configured with a variety of software offerings, from firmware-only to fully integrated and verified software operating environments.

### FIRMWARE

The blade has a pre-installed BIOS and IPMC firmware that allows installing operating systems and integrating it into hardware platform management.

BIOS firmware includes support for:

- Unified Extensible Firmware Interface (UEFI)
- Power management
- Multiple boot options including:
  - Local and externally connected hard disks
  - On-board solid-state disks
  - External USB boot media
  - PXE boot via ATCA base and fabric interfaces as well as front panel network interface
- RAID 0/1 support via SAS BIOS extension (available on RTM options)
- Serial redirection of the BIOS console
- Serial over LAN of the BIOS console via ATCA base interface
- BIOS upgrade via local host

### INTELLIGENT PLATFORM MANAGEMENT CONTROL

The ATCA-7540-D features an intelligent platform management controller (IPMC). The IPMC provides interfaces for hardware platform management that allow monitoring status, event logging, and recovery control of the blade. Features include:

- Compliance with PICMG 3.0 and IPMI 2.0
- Firmware (BIOS, IPMC, FPGA) upgradable from IPMI interface (LAN, IPMB), PICMG HPM.1 support or via Basic Blade Services (BBS) firmware upgrade utility
- Firmware rollback capability
- Support for serial port redirection over LAN interface

### SUPPORTED OPERATING SYSTEMS AND APPLIANCES

CentOS and DPDK have been ported to the blade but the ATCA-7540-D is designed to operate with:

- Other open source operating systems
- Commercial operating systems
- VMware ESXi

Operating systems such as CentOS, Ubuntu, RedHawk and Red Hat 7.x can run on the blade. Linux derivatives can be combined with Basic Blade Services (BBS) provided by Artesyn. BBS provides services that help to integrate the blade into a system context and manage blade resources. The Basic Blade Services include:

- Hardware Platform Management including local IPMC, LED, E-Keying and blade extraction software
- Firmware upgrade utility
- Supervision of optical modules

The ATCA-7540-D can be configured for virtualization using Linux KVM or VMware ESXi. Applications can benefit from the Intel Data Plane Development Kit (DPDK). DPDK enables ways for effectively handling packet processing capabilities by exploiting network silicon, processing resources and hardware off-load engines available to the blade.

### RELEVANT STANDARDS

- Linux Foundation
- Service Availability Forum™ (SA Forum)
  - Hardware Platform Interface (HPI) – HPI-B.02

## Hardware Specifications

### PROCESSOR

- Two Intel® Xeon® Gold or Silver embedded processors
  - Intel® Xeon® Gold 5119T with 14 cores at 1.9GHz
  - Intel® Xeon® Silver 4114T with 10 cores at 2.2GHz
  - Optional PCH with Quick Assist Technology (QAT) adding hardware acceleration for network security, routing and storage
- Enhanced features (Intel AES-NI, AVX/SSE, VT, 64 bit, power management)
- SMP and HT support

### MEMORY

- DDR4-2400 memory controllers integrated into processors
- Total of six independent memory channels per CPU socket
- Scalable memory capacity 96, 192 and 384GB
- Support for memory integrity (ECC)

### MASS STORAGE

- Up to two on-board M.2 SATA/NVME solid state disks (80 or 110mm)
- Hot-swappable hard disk options on RTM

### BASE AND FABRIC INTERFACES

- PICMG® 3.0 base interface compliant, Gigabit Ethernet (1Gbps)
- Dual star ATCA Fabric Interface with two 40 Gigabit Ethernet (KR4) channels, or PICMG 3.1, Option 9 (10Gbps), Option 1 (1Gbps)

### COUNTERS/TIMERS

- Real-time clock
- Programmable watchdog timer

### POWER REQUIREMENTS

- Dual-redundant -48/-60 VDC (TNV-2) rail
- Input range: -39 to -72 VDC

### EXTERNAL INTERFACES

- Front panel
  - Single 1/10GbE Ethernet via SFP+
  - One 10/100/1000 Base-T Ethernet via RJ-45
  - Optional VGA via 15-pin connector
  - Single serial console via RJ-45
  - One USB 3.0 (can be disabled for secure applications )
- Rear transition module
  - See RTM section for product options

### THERMAL CHARACTERISTICS

- Blade variants designed for NEBS L3
  - Operating range: -5 °C to 55 °C
  - Airflow requirements: PICMG 3.7 Release 1.0 or higher depending on configuration options

### BLADE PHYSICAL CHARACTERISTICS

- 8U form factor, 280 mm X 322.5 mm, single slot
- Alignment block that secures the blade in the Artesyn AXP1440-D ATCA chassis with captive screws
  - Improves operational shock and vibration performance
  - Prevents wear on connector contacts during operational vibration

### RELEVANT STANDARDS

- PICMG 3.0 (form factor, IPMI, base interface, hot swap, RTM)
- PICMG 3.1 R2 (fabric interface)

#### Supported Rear Transition Modules

| Rear Transition Module            | Networking Capabilities |                         |                                   | Storage                               | I/O                           |                   |
|-----------------------------------|-------------------------|-------------------------|-----------------------------------|---------------------------------------|-------------------------------|-------------------|
|                                   | 40Gbps Ethernet (QSFP+) | 10 Gbps Ethernet (SFP+) | 1Gbps Ethernet 1000-base-T, RJ-45 | Disk bay for hot-swap hard disk, 2.5" | SAS I/F on SFF-8470 connector | USB 2.0 interface |
| RTM-ATCA-7360                     | -                       | -                       | 6                                 | 1                                     | 2 SAS                         | 1                 |
