The SMT05E series are non-isolated dc-dc converters packaged in a surface-mount footprint giving designers a cost-effective solution for conversion from a 3.3 Vdc to 5 Vdc source. The SMT05E has a wide input range (3.0 Vdc to 5.5 Vdc) and offers a wide 0.75 Vdc to 3.63 Vdc output voltage range with a 5 A load, which allows for maximum design flexibility and a pathway for future upgrades. The SMT05E is designed for applications that include distributed power, workstations, optical network and wireless applications. Implemented using state of the art surface-mount technology and automated manufacturing techniques, the SMT05E offers compact size and efficiencies of up to 94%.

Output Voltage Adjustment

The ultra-wide output voltage trim range offers major advantages to users who select the SMT05E-05W3V3J. It is no longer necessary to purchase a variety of modules in order to cover different output voltages. The output voltage can be trimmed in a range of 0.75 to 3.63 Vdc.

When the SMT05E-05W3V3J converter leaves the factory, the output has been adjusted to the default voltage of 0.75 V.

- When Vin ≥4.5 V, then Vout can be adjusted from 0.75 3.63 Vdc
- When Vin <4.5 V, then Vout can be adjusted from 0.75 2.75 Vdc

Notes:

 The SMT05E features a 'Negative Logic' Remote ON/OFF operation. If not using the Remote ON/ OFF pin, leave the pin open (the converter will be on). The Remote ON/OFF pin is referenced to ground. The following conditions apply for the SMT05E:

 Configuration
 Converter Operation

 Remote pin open circuit
 Unit is 0N

 Remot pin pulled low
 Unit is 0N

 Remote pinpulled high [Von/off > 2.5 V]
 Unit is 0FF

A 'Positive Logic' Remote ON/OFF version is also possible with this converter. To order please use part number SMT05E-05W3V3-RJ or SMT05E-05W3V3-RTJ.
